SARAS TANNA

Software developer

DETAILS

- sarastanna1608@gmail.com
- India
- +916353707382

SKILLS

- Python
- Java
- C
- Selenium WebDriver
- XPath
- Google API
- Google Sheets API
- JSON
- PostgreSQL
- RDBMS
- Linux
- Git
- Full-Stack Development

LANGUAGES

- English
- Gujrati
- Hindi

SUMMARY

BCA student at Parul University with hands-on experience in Python automation, web scraping, and data extraction. Skilled in building real-world solutions for business intelligence and e-commerce. Passionate about coding, cloud computing, and data-driven problem-solving.

EXPERIENCE

Consultant, Book My Cab

Jan 2025 — Dec 2025

Book My Cab (Live Consultancy Project)

Book My Cab is a live consultancy-based cab booking platform developed as part of Consultancy Project 2025 FITCS. The project focuses on creating a scalable and user-friendly transportation solution that allows users to book rides efficiently while improving overall operational management for cab services.

The system was designed to handle core functionalities such as cab booking, ride scheduling, customer management, and payment integration. The platform emphasizes smooth user experience, secure transactions, and efficient ride management through a structured and scalable architecture.

Key Contributions

Developed modules for cab booking and ride management.

Worked on payment integration and booking workflow.

Collaborated with a 5-member team on real-world client requirements.

Contributed to creating a scalable and efficient system architecture.

Focused on improving usability and operational efficiency.

Technologies & Concepts Used

Database management

System design and workflow management

Client-based consultancy development approach

- Boosted client revenue by 30% through strategic consulting solutions.
- Streamlined operations, reducing costs by 25% for multiple clients.
- Developed tailored strategies that increased client retention by 40%.
- Led cross-functional teams to deliver projects ahead of schedule.
- Implemented data-driven insights, enhancing decision-making processes.
- Facilitated workshops that improved client engagement and satisfaction.
- Identified growth opportunities, resulting in a 50% increase in leads.
- Cultivated strong client relationships, driving repeat business.
- Presented actionable recommendations that led to measurable results.

Developer

Jan 2023 — Dec 2023

A Python-based automation tool to securely retrieve, parse, and process data from Google Sheets, reducing manual effort and enabling real-time data access for analysis and reporting. Built using Google Drive & Sheets APIs with OAuth 2.0 authentication. Automated data retrieval, reducing manual intervention significantly. Integrated gspread and oauth2client libraries for efficient data handling. Created a scalable foundation for automated reporting and decision support systems.

Web Scraper

Jan 2023 — Dec 2023

An automated web scraping application developed using Selenium to extract structured doctor profile data from the Apollo 24/7 platform, ensuring accuracy and consistency. Extracted key details such as doctor names, specialization, years of experience, and fees. Handled dynamic content using XPath selectors for reliable scraping. Implemented Unicode handling for clean and human-readable outputs. Organized raw web data into structured datasets for reporting and insights.

EDUCATION

Bachelor of Computer Applications (B.CA), Parul University, Vadodara, Gujarat

2023 — 2026

- Graduated with a Bachelor of Computer Applications (B.CA) degree
- Completed a capstone project on AI-driven web applications

CERTIFICATIONS AND LICENSES

Linux – IIT Bombay, RDBMS PostgreSQL – IIT Bombay, C Programming – IIT Bombay, Java – IIT Kharagpur
